KARENG
TECHNOLOGIES

Quotation for Digital Library Management System

Quotation No: kar/edu/18052023/01

Submitted to:

**The Principal,
Dakshin Kamrup Girl's College
Mirza, Kamrup (R) Assam
Date: 18th May, 2023**

Kareng Technologies, one of the foremost software companies in North-East India, was initiated on 2013 and it has been growing expeditiously in web domain and ERP both in private and public sector, since its inception. Kareng started with a very aggressive and vigorous team with a vision of being best in the software field. Kareng Technology has entrenched itself as a front-runner in the chosen domain with a very careful and convenient planning and punctilious and conscientious project execution within a short span of time.

Kareng is registered under SSI (Small Scale Industries) and the headquarter is situated in Guwahati, Assam.

We have a team of very talented and electrifying Software Developers, Project managers and Team Leaders. All the hard working professionals are engaged in improving the quality and speed of delivery day by day.

We are constantly finding innovative ways to blend people, process and technologies to deliver bottom-line benefits to customers. We have serviced clients in Industry segments such as Educational Institutions, Real State, E- Governance, Automobile, Tourism, E-Commerce, Hospitality, NGO, Security Services, Construction Companies etc. We measure our contribution through increased customer satisfaction, client retention rate and value delivered. Founded by Engineering and Management graduates having a rich industry experience of worked with big corporate groups. The organization is highly solution oriented and provides synchronized IT-solutions to all clients.

To come across the ever changing needs and to conceive new solutions of business and to make them sustainable, consistent and future proof Kareng Technology invests extensively in R&D

Staying at the Forefront of Technology

Our wide range of deliverables encompasses some of the following areas of our expertise:

- IT and Business Consulting
- Systems Integration and Application Management
- Infrastructure Management
- Software Product Development
- Web Designing
- Domain and Hosting solutions
- Hardware & Server Services

Come and see your business transform into a Global Brand through our most sought after and Advanced Information Technology Solutions, Software Development Applications and **360 degree Business Solutions**.

Module wise Project Details:

#	Module Name	Description
1	User Interface	This module has two parts. One is for the actual interactions with users. The other is client services that allow users to decide where to search and what to retrieve, interpret information structured as digital objects, manage relationships between digital objects and convert the protocols used by the various part of the system.
2	User Management	This module used for data entry and management and categorize users like student, staff, guest etc.. and users data entry, block / allow an user, monitor user's activity provide role to users.
3	Reports Analysis	This module includes the analysis of DL use. Reports of uses of DL with graphical representation and analysis of the same.
4	Administrative Panel	The name of this module describe it, administrative panel allows the administrator manage the activities and users of DL. Activate Deactivate account, book availability management etc are done by this module
5	Repository	This module store and manage digital objects and other information. A digital object is a data structure whose principal components are digital materials, or data, and key-metadata. The key-metadata includes a globally unique identifier for this digital object, called a handle; it may also include other metadata. The data can be elements or other digital objects.
6	Handle System	Handles are general-purpose identifiers that can be used to identify Internet resources, such as digital objects, over long periods of time and to manage materials stored in any repository or database.
7	Search System	When a digital library system is designed, it is assumed that there will be many indexes and catalogue that can be searched to discover information before retrieving it from a repository. These indexes may be independently managed and support a wide range of Protocols and this module handles complete search mechanism.
8	Digitization and Data Upload System	Digitization is the process of taking traditional library materials that are in form of books and papers and converting them to the electronic form where they can be stored and manipulated by a computer. i. Digitization means no new buildings are required; information sharing can be enhanced and redundancy of collections reduced. ii. Digital materials can be sorted, transmitted and retrieved easily and quickly.
10	Domain And Web Hosting	For Web Access
